

# SEMI-PERMANENT BONDING – THE SENSITIVE SOLUTION

## STEP BY STEP: TOUP PRODUCTS

The hair system is only temporarily attached to the scalp by temporary bonding. The gluing situation can thus be regularly adapted to the requirements of everyday life. The scalp and hair system can be cleaned intensively by regularly removing the hair system and the adhesive. This makes temporary bonding particularly suitable for sensitive customers with demanding scalps.

If you still have questions or if you are stuck at a step, you can reach us during our business hours at +49 2241 25527-17.

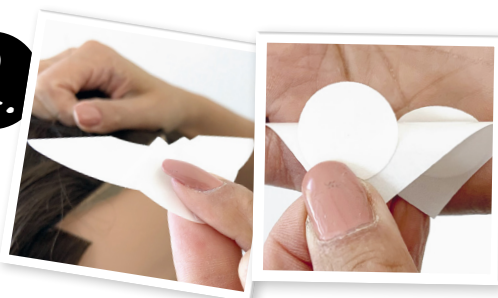

### Tip

Clean the scalp and hair system deeply. Keep them free of grease and residue throughout the treatment.

**TOUP FRONT**  
700304

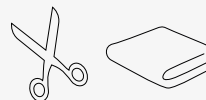

**TOUP SPOT**  
700302

**TOUP TAPE**  
700300, 700301

### TOUP PRODUCTS

Durability: In perfect conditions up to 3 days

### Additional materials required:

## Steps 1-6

1.

Cut the adhesive strip to the desired size and shape. The protective film remains on the adhesive strip. Various shapes make it possible to glue curves.

2.

The excess protective film is removed from the adhesive strip so that it can be placed.

3.

The cut adhesive strips are glued on at the desired location.

4.

The protective film is removed from the adhesive strip so that it is activated.

5.

The hair system is attached to the vertebral area and rolled off with slight pressure and tension to the side over the head arch up to the forehead. Depending on the hair situation, rolling from the forehead to the spinal area is also possible.

6.

The adhesive is activated by body heat. With the help of a towel and pressure, the glue heats up and the liability is activated.

3.

4.

5.

### Tip

Regular adjustment of the gluing method possible.

6.
